

## OLEO – JD

<b>Position:</b>	Wellsite Geologist	<b>Reference No.:</b>	2013_1152_LR_GEO
<b>Discipline:</b>	DRI	<b>OLEO Business Unit:</b>	E&P
<b>Place:</b>	Worldwide	<b>Working System:</b>	
<b>Starting Date:</b>	January 2014	<b>Duration:</b>	
<b>Reports to:</b>	Operations Geologist		

OLEO is a leading independent consulting company providing both the Projects Owners & Contractors with a wide range of technical assistance services.

We are currently looking for a Wellsite Geologist for various oil & gas projects located worldwide. The Wellsite Geologist will be responsible for performing all geological and formation evaluation activity at the rigsite. He/She will also work closely with the Drilling Supervisor to come up with the safest and most efficient plans to drill a well while meeting all expectations.

### **Responsibilities:**

- Perform all geological and formation evaluation activity, supervision and reporting, including Well Final Report.
- Comparing data gathered while drilling with predictions made at the exploration stage.
- Quality Control of conventional Wireline Logging acquisition and draft deliverables. Quick-look log evaluation and recommendation of sampling intervals/points for sidewall cores, fluid samples and pressure measurement tests.
- Supervising of Mudlogging and LWD services, including draft reports and deliverables.
- Assure the reliability of the acquired data.
- Select coring, logging and casing points according with the approved Well Program.
- Control of sleeve core drilling, handling and core description.
- Advising Drilling Supervisor on drilling hazards.
- Training staff as required.
- Work in the office during the interwell periods.

### **Profile:**

- Degree in Geology from a recognised University.
- 10 years' experience in well geological operations, at least 3 of them as Wellsite Geologist. Demonstrated experience in onshore and offshore wells is required.
- Fluent in English. Knowledge of other languages will be a plus.
